+ OBJECTIVE:

Whether it be a small start-up business or a large enterprise company, contract or full-time... I am always seeking new and exciting opportunities and projects to collaborate on. I appreciate your consideration of me as an addition to your team, and I look forward to hearing from you!

+ PROFESSIONAL EXPERIENCE:

Senior Front End Developer

Oppenheimer Funds in Centennial, CO

August 2014- Current

- Building with HAML, SASS, Zurb Foundations, jQuery, Javascript, AngularJS and Ruby on Rails to create flexible user interfaces
- Key part of the Oppenheimer Agile team that is developing the new Investor website for Q4 launch
- Pair programming with Rails developers to develop and customize UI for the new site
- Utilizing AngularJS to build out custom site validations and routing
- Utilizing methodologies such as Agile and SCRUM to manage workflow

Senior Front End Developer

DaVita in Denver, CO

March 2014- August 2014

- Working closely with the BAs, Analysts and the core Davita business team to develop a custom application for use by DaVita clinics world wide.
- Responsible for leading UI/UX focus groups to gather data and analytics to be used in the design/development process.
- Creating concepts, low fidelity mock-ups, high fidelity wireframes, and UI/UX specifications for the application and development team.
- Leveraging HTML5, CSS, SASS, jQuery, Javascript, AngularJS and Sharepoint 2013.
- Utilizing AGILE methodology daily to ensure proper project workflow throughout the SDLC Process within the DaVita development team.

Lead UI/UX Developer (Project Lead/Mgr)

AT&T Mobility in Greenwood Village, CO

Nov 2013 - March 2014

- Collaborating with a variety of teams including developers, BAs, SAs and operations to develop strategies for rich intuitive interfaces that always keep scalability and usability in mind throughout the project lifecycle.
- Leveraging HTML, CSS, jQuery/Javascript and MVC frameworks to design/develop and maintain complex user interfaces and responsive solutions for a variety of internal and external applications at AT&T.
- Utilizing methodologies such as Agile and SCRUM and making sure UI/UX is accounted for within those processes.
- Project lead on design and development of a new tablet design for AT&T's POS and account management systems in stores nationwide.
- Producing low/high fidelity mock-ups, wireframes, and UI specifications as needed to assist the business team with developing new application enhancements.

+ REFERENCES:

“ Thomas is an extremely gifted and creative individual. If you are looking for a quality designer or general marketing professional you cannot go wrong by adding him to your team. Thomas is a highly productive, intelligent, and flexible person who will help raise the quality of any team he is a part of. ”

~ Christopher Aron

AT&T Mobility - Denver, CO

“ Thomas is a detail oriented designer with great imagination. He is responsible for the majority of our custom CRM system look and feel redo and manages the UI/UX for just about every front end project here at Cricket. His designs are clean, mirrors what the customer wants and delivered on time. Thomas is such a valuable member of our contracting team that we are bringing him on full time here at Cricket. I would highly recommend Thomas for any UI/UX work. ”

~ Richard Cook

Cricket Communications- Greenwood Village, CO

“ RBSI initially hired Thomas for a 2 month project for some web related development we needed for one of our customers. Thomas did such an outstanding job for us that the assignment stretched to 7 months. We plan on using Thomas again on upcoming projects we have slated. Not only did Thomas do exceptionally good work for us - but he has a great attitude and interfaces extremely well with the end customer. ”

~ Damon Veazey

RBSI Consulting, Inc. - Bartonville, TX

+ SUMMARY:

I am proud to define myself as a UI/UX Designer and Developer focusing on creative composition, strategy and most importantly... user experience. I have a core belief that even the most mundane of tools and processes that we interact with from day to day can be engaging and exciting to use with the right creative approach. I have a diverse background in web development and UI/UX with an underlying core of fine art and graphic design principles. I focus on clean code and designing complex interfaces and tools that create an engaging user experience.

I consider myself a highly motivated, deadline driven, clever and creative professional. I possess over fifteen (15) years of experience in the field and have expert knowledge and proven skills in leveraging the Adobe Creative Suite and current web design/development tools and frameworks to create unique and innovative solutions for the web, applications, mobile and print solutions. I am comfortable in delivering in high pressure environments on time, every time.

My education and extensive professional experience allow me to navigate the complete life cycle of a development process, working with teams and personalities of all types. The qualifications and professional knowledge I can bring to the team includes:

- Solid understanding of HTML5, CSS3, jQuery, and a variety of current frameworks
- Proven hands-on experience with managing and maintaining small and large UI/UX projects throughout the SDLC
- A thorough understanding of information architecture and enterprise systems
- Ability to work hand-in-hand with business owners and both technical/non-technical staff
- An entrepreneurial background giving me a unique understanding of working directly with a variety of clients

Whether it be a small start-up business or a large enterprise company, contract or full-time... I am always seeking new and exciting opportunities and projects to collaborate on. I appreciate your consideration of me as an addition to your team, and I look forward to hearing from you about your specific need!

Sincerely,

Thomas J. Wicker

UI/UX Designer and Developer
