

Proposed Home Page on Mobile Device

Home page of new WEST desktop web app after it has determined the viewer is browsing at a window size of 680 pixels or less.

Proposed Home Page on Mobile Device

Example of viewer scrolling from top to bottom on the new home page. Pages will scroll, however the header will stay locked in place. This will allow the body of the page to slide up and under the header.

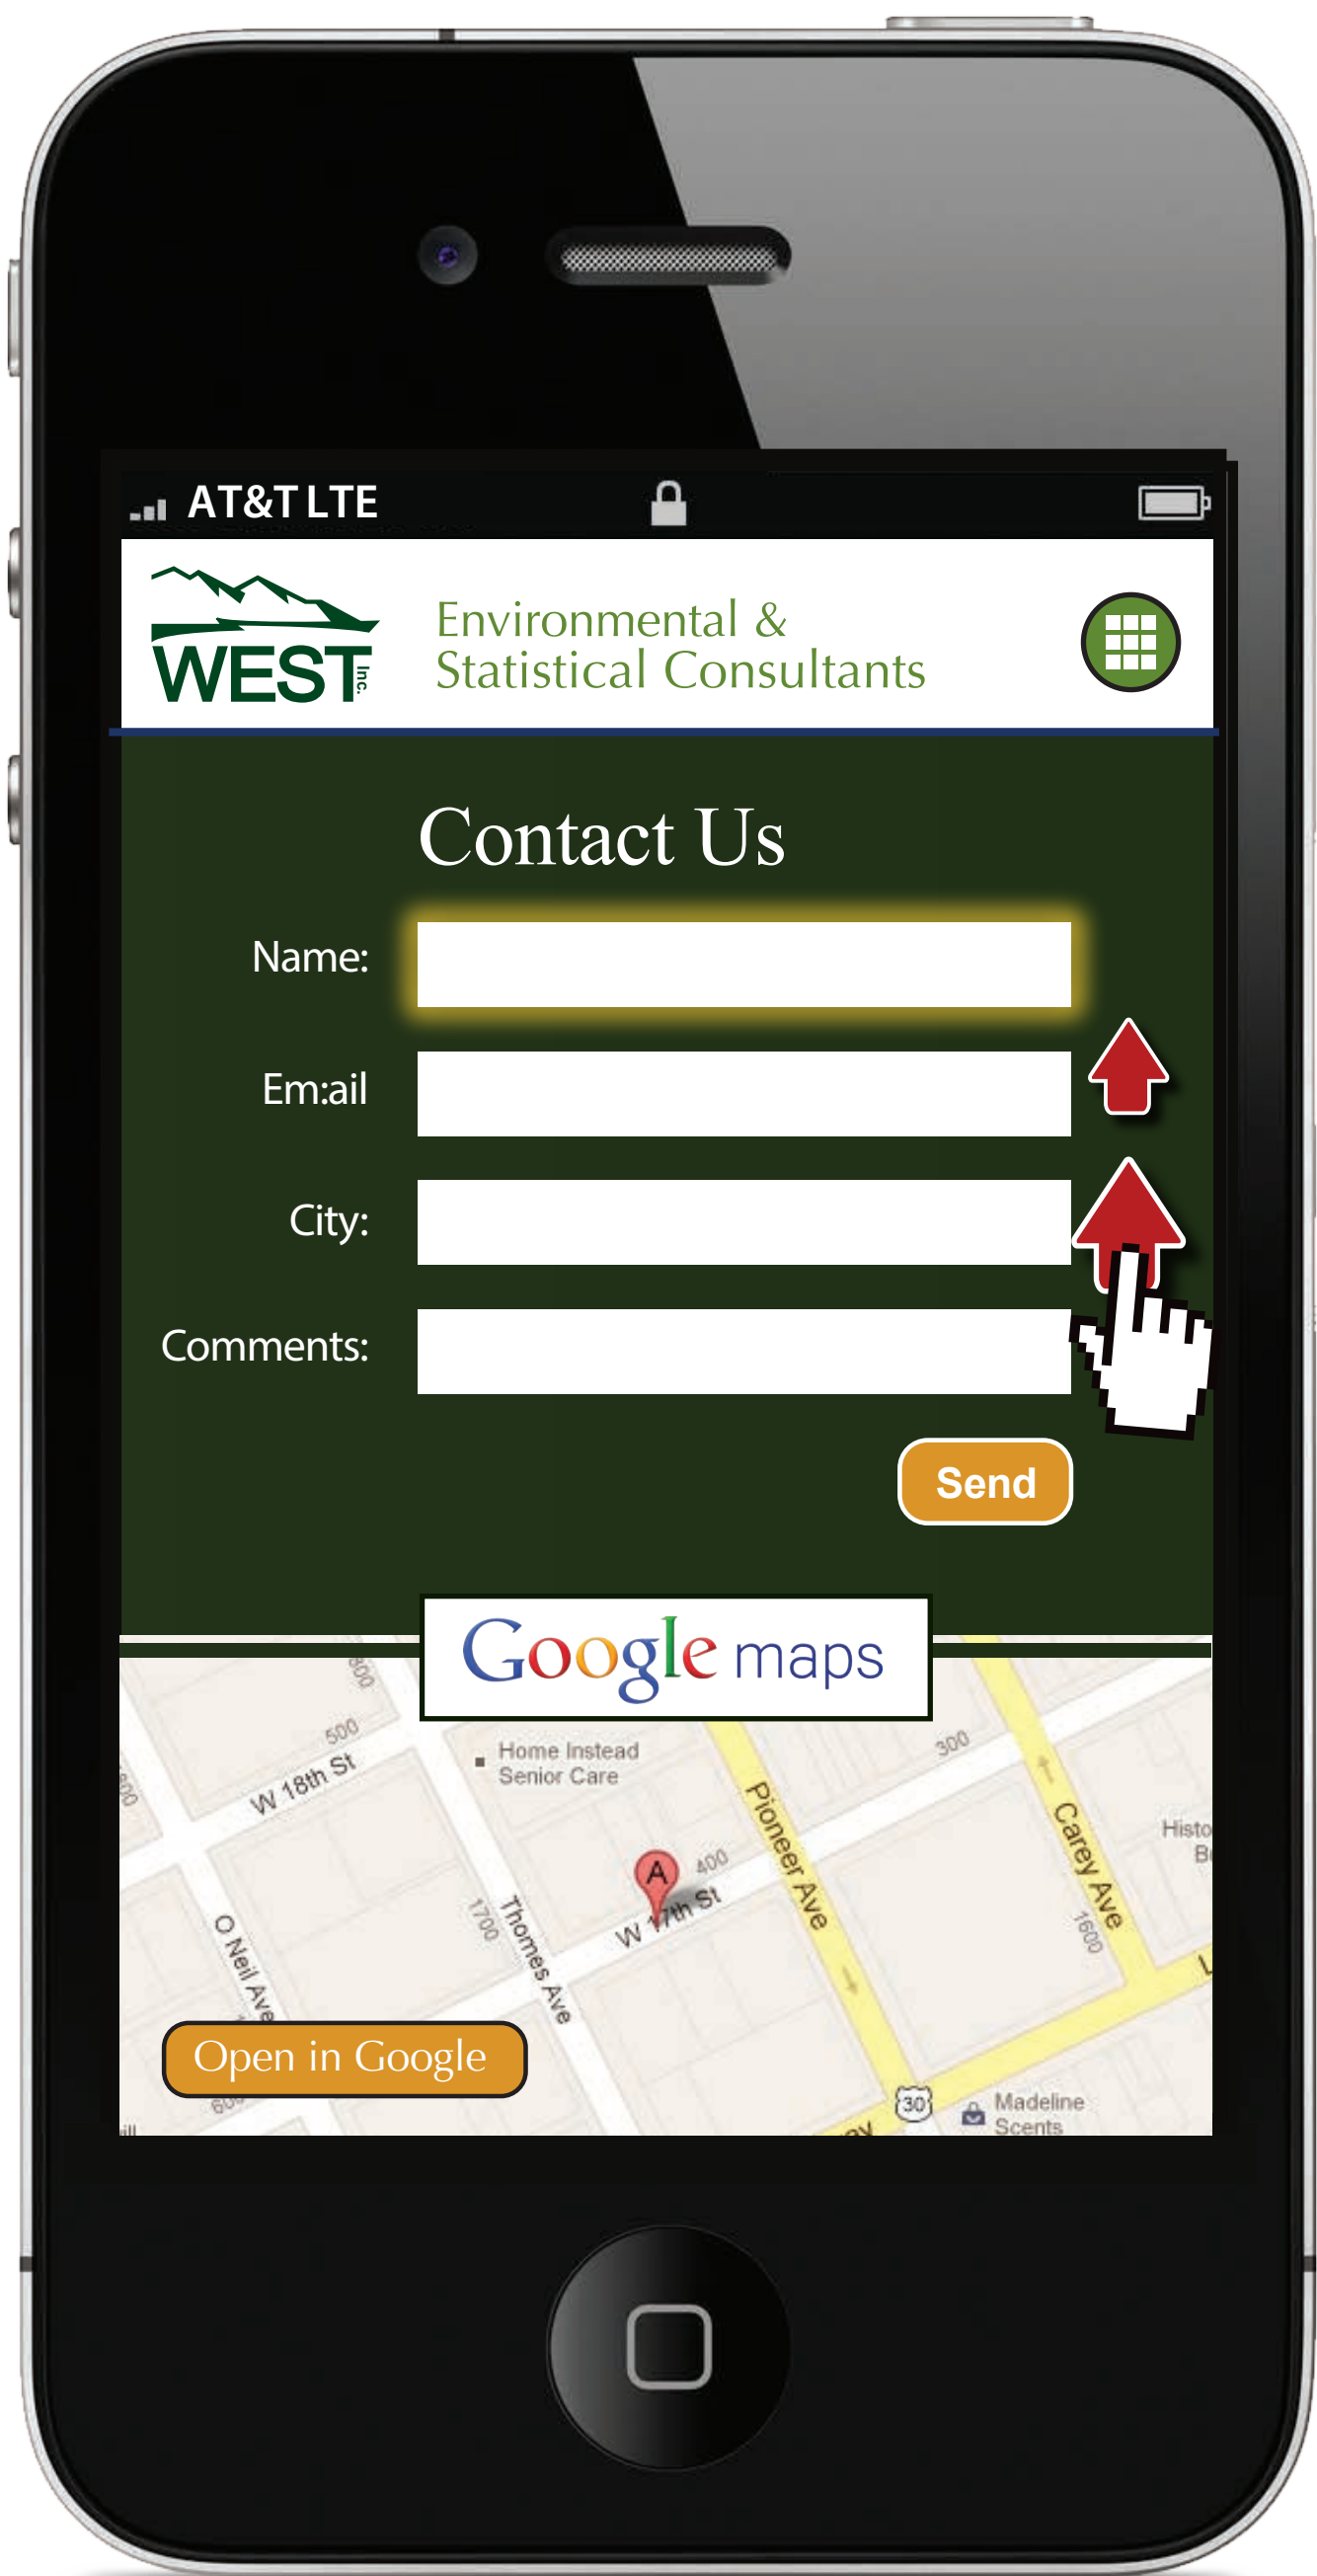

Proposed Home Page on Mobile Device

Viewer is scrolling to the bottom of the new web app home page.

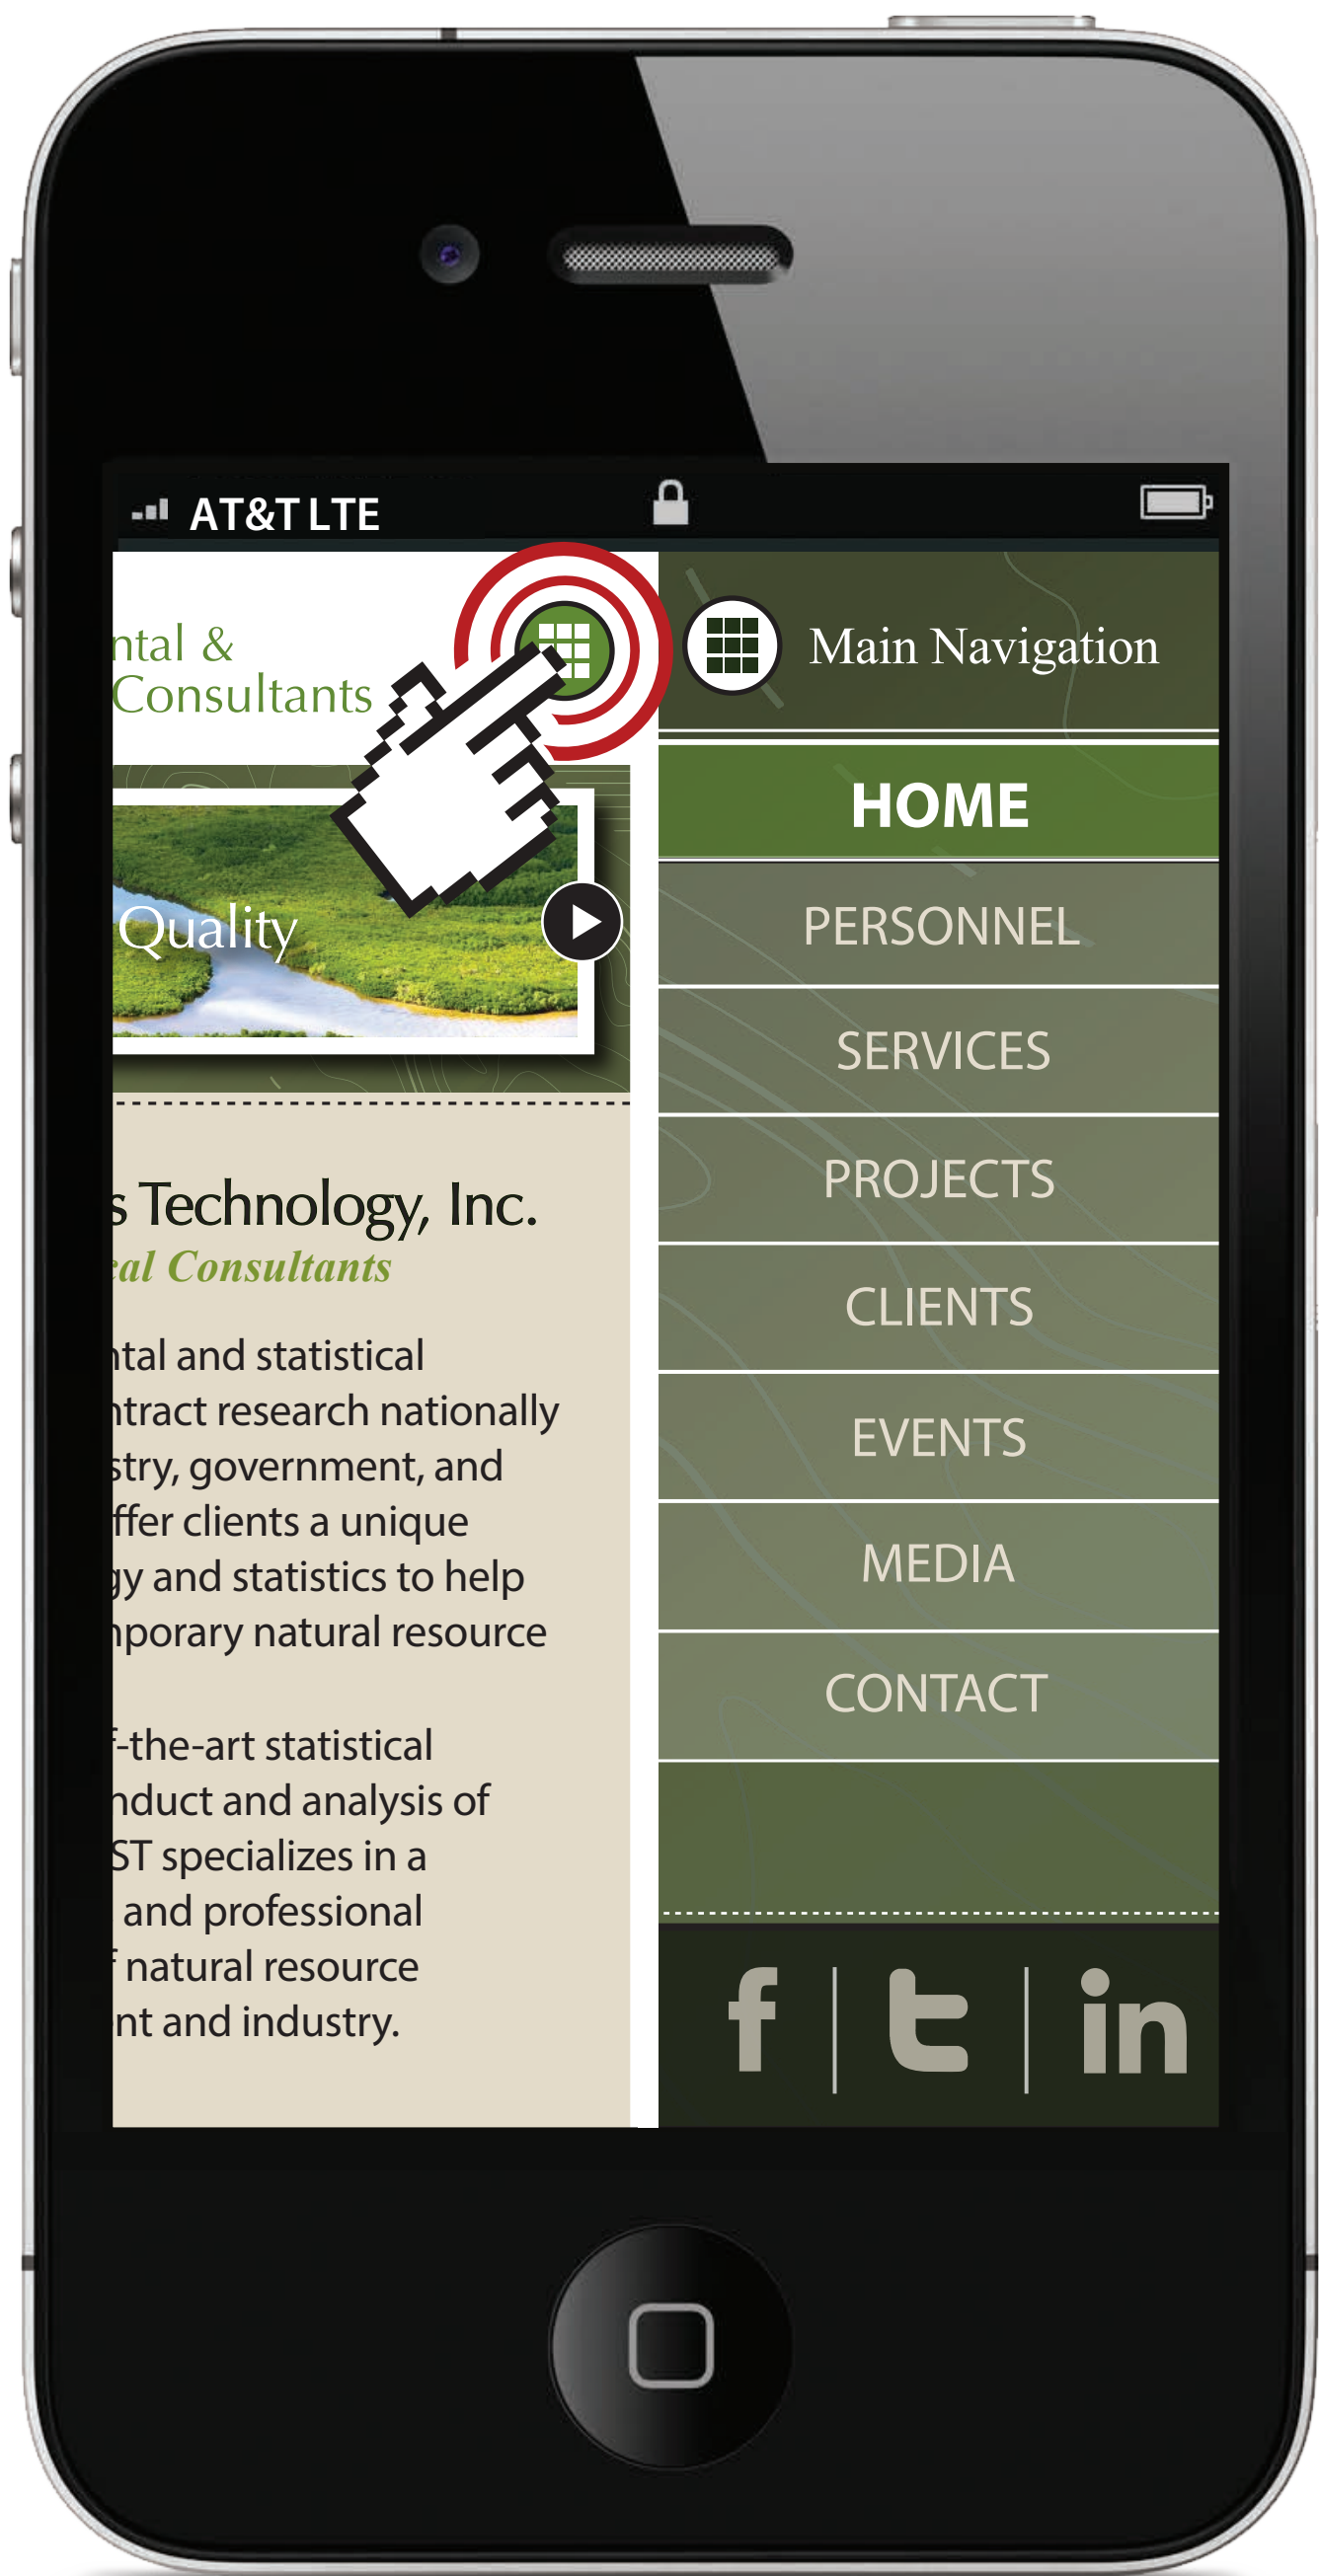

Proposed Home Page on Mobile Device

Viewer is scrolling from top to bottom on the home page. Page scrolls and header stays in place and slides the content up and under the header.

Slide Out Hidden Navigation System

When green nav menu button is pressed at the top, the entire page design slides to the left and the navigation slides in from the right covering half of the screen as an interactive overlay of mobile navigation links.
